REMSA to host USA Pavilion at InnoTrans 2018 in Berlin

WASHINGTON, DC – The [Railway Engineering-Maintenance Suppliers Association](#) (REMSA) will once again host the USA Pavilion at [InnoTrans 2018](#), Sept. 18-21, Berlin, Germany. InnoTrans, the world's largest rail transport and technology trade show, is held biennially and attracts over 120,000 visitors from over 100 countries. The trade show is divided into five major segments: Railway Technology, Railway Infrastructure, Public Transport, Interiors and Tunnel Construction.

The USA Pavilion offers a turnkey service to exhibitors, which drastically simplifies exhibiting at an international trade fair. The pavilion layout will hold a common exhibit area that includes internet, refreshments, seating, and meeting space along with booth space for each exhibition company; translators will also be present. Additional benefits to exhibitors include support and guidance on translation and shipping materials; transportation advice including airport, hotel, and expo center transfers; and access to the USA Pavilion room block. Approximately half of the USA Pavilion slots are already reserved.

“The exclusive USA Pavilion provides a tremendous opportunity for U.S.-based railway supply companies and organizations to highlight their goods and services at one of the premier railway trade shows in the world,” said REMSA CEO & Executive Director, David Tennant. “In 2016, over 140,000 individuals from more than 140 countries participated in InnoTrans. This is an audience you do not want to miss.”

“REMSA and the USA Pavilion make exhibiting internationally easy,” said Tom Smith, Director, Business Development at LORAM Maintenance of Way, headquartered in Hamel, MN. “InnoTrans is a must visit trade show for us and we are excited to once again participate in the USA Pavilion in 2018.”

For further information on exhibiting at the USA Pavilion at InnoTrans, visit:
